Update: Virginia Dementia Care Coordination Roundtable

Mr. Worthington updated workgroup members on the formation of the Dementia Care Coordination Roundtable and the discussion at the meeting held in January. He noted that Joe Gaugler of the University of Minnesota, Quincy Samus from Johns Hopkins, and Sheryl Zimmerman from University of North Carolina Chapel Hill had presented on their grant proposal for the national Dementia Care Coordination Research Center. Virginia would be a first-year spotlight state which would provide it with

George Worthington

funds to support the Roundtable and efforts to conduct research into care coordination efforts in Virginia. The grant will be awarded in June.

Prioritizing Goal 1 & 4 Strategies

The group worked on prioritizing strategies under Goals 1 (statewide coordination) and 4 (care coordination) of the Dementia State Plan into short, medium and long-term, and high priority. Short-term strategies are those that are ongoing or can be achieved within one year; medium-term strategies are those that can be achieved within the four-year Plan period, and long-term are those that are unlikely to be achieved within four years, but for which incremental efforts can be made. High priority strategies are those of any term that are considered especially important to work on. The prioritization effort is the first step of developing the implementation plan that is a required component of the BOLD Healthy Brain Virginia project. The group worked on strategies through Goal 1, Objective 1.2 before running out of time. Members agreed to submit their prioritization grids to Mr. Worthington, who will collate responses and reply to the group.
